

COULDN'T MAKE CASE STICK

INJUNCTION REFUSED THE GOODLAND TELEPHONE CO.

Case Was Tried at Chambers Before Judge Charles W. Smith Tuesday at Hill City.

The Goodland Telephone company, owned by a co-partnership consisting of C. E. Swartz and J. M. Jewell, sought to secure an injunction against the Goodland Light and Power company this week, the case being tried before Judge Smith in chambers at Hill City Tuesday, May 22.

Plaintiffs secured an order from Judge Smith at Stockton last week in a modified form of injunction, restraining the Light and Power company from further setting poles claimed of until a hearing should be held at Hill City Tuesday. E. F. Murphy represented the telephone company and E. S. Knight represented the light and power company.

The case was heard by the Judge Tuesday, who is holding court at Hill City, and the petition denied. The following is a copy of the decree by Judge Smith in deciding the case:

"The Goodland Telephone company, a partnership at this time composed of C. E. Swartz and J. M. Jewell, plaintiffs.

"The Goodland Light and Power company, a corporation, and William Frazier, defendants.

"Now, on this 22d day of May, 1906, this case came on to be heard at chambers before Judge of said court at Hill City, Kan., pursuant to notice, the plaintiff appearing by its attorney, E. F. Murphy, and the defendant appearing by its attorney, E. S. Knight. The plaintiff presented his cause and rested, after which said defendant presented their cause and rested. And the court, after listening to the argument of counsel for both plaintiff and defendant, and being advised in the premises, the temporary injunction asked for by the plaintiff is hereby denied.

"To which ruling of the court the plaintiff then and there duly excepted. Approved by me this 22d day of May, 1906.

CHARLES W. SMITH, Judge.

The plaintiff offered affidavits made by J. M. Jewell and H. E. Lowe, both of whom stated that they were electricians, and that service on the telephone lines of the plaintiff would be jeopardized by the placing of electric poles so as to come in contact with the wires of the telephone system. The fact that the wires coming in contact with wood would injure telephonic service was denied by defendants, and in proof of the same, they cited the facts that the telephone company itself had, in many places in Goodland, not used glass insulators on which to string the wires but had merely wrapped the wires around the wooden poles. And of course what they had done themselves without injury would not be an injury if done by somebody else in placing poles with a dead wire attached to it for guying purposes. The plaintiffs, therefore, were not able to make their particular contention stick.

The poles complained of by plaintiffs run up through the wires of the telephone company. But these will be used simply as poles to support the lights by the use of guy wires. The live wires will come from the other poles, where no interference is claimed, will reach to the middle of the street to the arc light, and loop back to the pole from which it came.

So it appeared to Judge Smith that there was no real or threatened injury to the lines of the telephone company, and he suggested that if injury did come from either company to the other through the construction and operation of its plant, relief could be secured by suit for damage.

(Extract from Dr. Chapin's letter in regard to my painless method of extracting teeth.) "It is a fine thing; we use it at the dental college altogether now in place of gas." Dr. R. B. Harvey.

RATTLESNAKE KILLED HIM.

Andrew Anderson, 72 Years Old, Received Fatal Bite Friday.

Andrew Anderson, who had weathered the storms of 72 years without serious hurt, could not have believed that death was lurking under the slanting sod when he turned it over last Friday to kill a rattlesnake that had taken refuge for defense against his common foe. But that was the case. The old gentleman, who lives on his farm, thirteen miles north of Kanorado, was in the field operating a riding plow, when he observed a rattlesnake crawl from under the machine and to go into hiding under an upturned sod nearby. He stopped the plow, and with a wrench in hand started after the snake. Not being certain just where the snake was, Mr. Anderson pushed back a sod with the wrench when the rattlesnake struck him on the back of the thumb. He had to shake his hand several times before the fangs would come out, and when they did, the fangs tore his flesh for an inch.

Mr. Anderson was about a quarter of a mile from the house and the half hour that intervened before he reached home with the team he could have resisted the work of the poison were it not for one thing. Before the accident happened, his right hip had been cut by his hand flying off the lever when he was raising the plow, and striking him in the mouth. He nevertheless sucked the poison from the wound, but the poison was conveyed to the blood through his injured hip, and when he got home, his mouth and neck were quite swollen and his arm affected clear to the shoulder.

His daughter, who was living with him, gave him whiskey and used local applications, but the old gentleman grew worse and suffered great pain. The following day a doctor from Burlington was called, and administered hypodermic injections, and left medicine for the patient, but Mr. Anderson passed away in the afternoon of May 19. Funeral services were held at the home Monday at 10 o'clock, and burial made in the cemetery near Ashland, Colo.

Deceased leaves four sons, Oscar, living at home; Charlie and Otto of Kansas City; and Manuel of Jackson, Colo.; also two daughters, Mrs. Thilda Johnson of Heppburn, Ia., and Mrs. Alfred Anderson of this county. Gust Westman, clerk in the grocery department of the Millisack store, is a nephew of the deceased.

FOR RAIL INSURANCE

Jeweler and Optician

GOODLAND ATHLETICS FAST.

Win Two From Hays Normal, and One Game Lasted Fifteen Innings.

The Goodland Athletics entertained the Hays Normal school club to a warm reception on Goodland grounds last Thursday and Friday, winning over the visitors in a fifteen inning game Thursday by a score of 6 to 5, and showed them speed again on Friday by a score of 3 to 2. Both games were fine exhibitions, and the players that "distinguished themselves" received the plaudits of the big crowd assembled.

The second game was a plain and unmistakable defeat for Hays. It was hard digging from first to last, with batting about even, but field work in favor of the Athletics, which pulled the game away from the Normal men. But the first game developed an unusual rag-chewing match, in which Hays knocked on a runner in the ninth inning. During the run to first the batter had after the ball at home plate. The batter landed a ground ball which was lifted to first, and there muffed. During the run to first the batter had after the ball at home plate. The batter landed a ground ball which was lifted to first, and there muffed.

After the howling was over, the game was a tie at the end of the ninth inning. From this point both clubs got right up and dusted, and goose-egged each other to the fifteenth inning, when Captain Stewart knocked the ball clear over the fence and made a home-run. Hays had nothing to be ashamed of, for they played well, but was in rather fast company.

RIDDLED SCHOOL BOOKS.

Mischievous Boys Do Had Work in School House of District No. 54.

Eight text books, arithmetic, geography, fifth reader, United States history, physiology, grammar, spelling book, and the book entitled "Uncle Tom's Cabin," were completely torn to pieces by some mischievous boys who entered the school building of district No. 54 recently, outside of school hours. The school house is situated near the Brannon place on the Smoky, and Miss Jessie Brannon is teacher. Mr. Brannon, who has the interest of the school at heart, says he has placed the responsibility for the damage done and may take action to punish the young offenders. He brought the mutilated book on history to this office, and the job was declared to be well done. If the youngster who worked so hard in getting a book to pieces would expend a little of the energy thus wasted, on the acquisition of the knowledge the book contained he would turn out to be a much better man and citizen of Kansas than such wanton destruction will ever lead to.

C. L. Harper Leaves.
C. L. Harper, accompanied by his wife, left Sherman county overland last week for Winfield; Cowley county, Kansas, on an extended visit with his parents and relatives there. Mr. Harper has lived in this county for a number of years, but about a year ago sold his farm near Ruleton. He said he liked western Kansas, but the move was necessitated on account of his wife whose health had not been normal, and a change of altitude was recommended.

WANTED AT ONCE.
To list some Sherman county land. Address R. L. PLANAGIN, Gen. Kansas.

B. F. Brown sells city lots.

DROVER IN EASTERN KANSAS

THAT IS WHAT MIAMI COUNTY MAN SAYS.

Was Here This Week and Was Surprised to Find the West So Well Off.

Western Kansas is in much better shape according to reports, than eastern Kansas, a far more modest and rainfall is concerned. The spring here has been unusually wet, and the farmers boast of the fact that they could not get into their fields to seed for spring grain, and corn planting was delayed considerably for the same reason.

On the other hand in eastern Kansas the spring has been dry, especially along the Missouri border. Mr. Dewese of Miami county, who arrived here last week, reports that in that county the drought has been very severe, and the season there being earlier than here, that crops are badly damaged. Monday's Topeka Capital said that the season there being earlier than here, that crops are badly damaged. Monday's Topeka Capital said that the season there being earlier than here, that crops are badly damaged.

This has been the driest spring which Topeka has experienced since the spring of 1892. The precipitation since the first of March has been 3.31 inches below the average for that period. Since the first of March the total rainfall has been 1.11 inches. The precipitation for the month of March was 2.31 inches, for April 1.27 inches and for the portion of this month which has passed, has been .74 inches.

The spring of 1902 was even more dry than this one has been and the rainfall for that year up to May 21 was 1.52 of an inch. However, the drought of that year was broken on the 21st of the month by a heavy rain, an inch of rain fell on the afternoon of that date. Heavy rains also occurred on the 22d, 23d and 24th of that month.

The average temperature of this spring has been one-half degree cooler than the average temperature of the spring of 1902. The weather predictions for today are for thunderstorms and lower temperature.

A heavy night rain fell in different parts of this county and in the eastern edge of Colorado. George West, living in the southeast part of the county, reports that rain fell in the vicinity of Burlington, Colo., thirty miles west of Goodland. A gentle rain fell here Tuesday night and on Wednesday.

George West, before mentioned, has 100 acres of winter wheat above knee high and in the commencement of bloom. John McCall, living in the western part of the county, was in Goodland last Saturday and reports his wheat and other small grain in condition. Last year he raised 9,000 bushels of small grain, and this year he has a large acreage out, with a good prospect of another good crop.

Mr. Dewese, the gentleman from Miami county, went with the representative of this paper into his corn patch in town. It was water in and uncultivated. The corn was up nicely and of a dark green color. Two inches underneath the surface, Mr. Dewese found that the soil was very moist. He expressed himself as very much surprised. He gave it as his opinion that the soil was very moist and well tilled, was certainly remarkable in its drought resisting quality, and much superior to the soil of the state in this respect. He was also surprised at the tree growths here, and the quality and depth of the soil.

OMAHA BOOSTER SPECIAL

Commercial Club in Goodland Thursday Morning.

The Omaha Commercial club special pulled into Goodland from the west Thursday morning about 9:15. The excursion was in charge of W. L. Yetter, C. M. Willheim, F. W. Judson, J. E. George and J. M. Gould, chairmen and secretaries of the club and its several committees. The officers were conveyed in carriages up town, and the procession on the streets was headed by the club's band. The members of the club were much interested in our growing city, and the greetings of our citizens and merchants were cordial, and the short stop here was a pleasant one to all concerned. Banners, souvenirs, and printed matter were distributed freely by the club.

Broadway Surveyed.
Surveyor D. A. Long of Ruleton run the line on both sides of Broadway last Saturday. Under the direction of the committee on streets and alleys, and also the street commissioner, who took charge of setting the stakes and other details. It is to be regretted that so many people will be put to the trouble of correcting the alignment of their yard fences, walks and shrubbery, because of mistakes made by people some few years ago regarding the width of the street. Broadway is a 100-foot street. Probably a year will be given by the city council to make the change.

A Mountain of Gold.
Could not bring as much happiness to Mrs. Lucia Wilke of Caroline, Wis., as did one 25c box of Bucklen's Arnica Salve, when it completely cured a running sore on her leg, which had tortured her 23 long years. Greatest antiseptic healer of piles, wounds and sores. 25c at C. A. Stevenson's drug store.

Card of Thanks.
We desire to express our most heartfelt thanks to all our neighbors and friends who so kindly and willingly assisted us during the last sickness and the funeral of our dear father, Andrew Anderson.

THE CHILDREN.
Land for Sale.
I have the following described land for sale: Southeast 21-3-40, and northeast 12-3-40, both 200 acres, \$14 per acre. Address, Owner, Box 274, Blue Rapids, Kan.

Windmills and Pumps.
I sell the Monitor windmill and pump, and also windmill repairs of all kinds. Office in the chambers of Jayne building. Goodland, A. J. Atherton.

Farm for Sale.
I have a 240-acre farm for sale, two miles west of Goodland, three-fourth mile from good school. Price \$15 per acre. If sold soon. See J. F. Kimmel, Goodland, Kan.

HAIL LOSSES.
Paid in full by B. F. Brown, Agent.

Drummers Wanted.
I want one or more drummers for Memorial service, May 26. I have two drums. THOMAS BUTTE.

Say, did you notice it is getting somewhat dry? A good time for hail when the rains come. Insure your growing crops against hail. You will want to know about the new plan. See J. F. Kimmel, office in First National bank.

MEMORIAL AND DECORATION.

The Days to Be Observed in Goodland With Becoming Ceremonies.

The plans are all complete for the Memorial and Decoration day services, both of which will be held in the Goodland opera house. Next Sunday, May 27, Rev. H. H. Ambrose of the Christian church will preach the Memorial sermon at 11 o'clock a. m. Rev. Woodward will be here, and he and the other ministers present will take part in the services. As the services are to be a union of all the churches, a large attendance is expected at the opera house. Good vocal and instrumental music will be furnished, and the Goodland orchestra will render appropriate selections. On Decoration day, the order of march will be in charge of County Treasurer J. W. Smith as marshal of the day. The procession will start from Union hall at 10 o'clock a. m., and proceed to the cemetery to decorate the graves. In the afternoon, the people will assemble at the opera house at 1:30, where the ladies of the Relief Corps will have charge of the program of song and recitations. The Goodland Military band will furnish instrumental music. The Decoration day address will be delivered by Rev. G. H. Woodward of Colorado City, formerly pastor of the Methodist church at this place, and an old soldier. Music, flowers and appropriate decorations will be provided.

These services should be attended by all who can possibly attend, and especially by the old soldiers, to whom the Memorial and Decoration day become more sacred as the years go by.

NO ONE WOULD EAT ALUM.

Food That Contains Alum or an Alum Residue is Unpalatable.

Here is some interesting evidence upon the alum baking powder subject:

Prof. A. S. Mitchell of Milwaukee, late chemist to the Wisconsin Dairy and Food Commission, in testifying before the Congressional Committee, which was collecting information to aid in the matter of pure food legislation, said that there was no question as to the tendency of the chemical impurities which would remain in food made with alum baking powders would be deleterious. As to the claim by the manufacturers that alum powders left no alum in the food, he said he had failed to find any such basis which, in the ordinary process of cooking, would not leave some soluble alum in the food.

Doctor Schweitzer, the accomplished professor of chemistry at the University of Missouri, after a series of experiences with bread raised with alum baking powder, reported: "Careful analysis of the bread thus prepared shows a portion of the alum from the baking powders remaining in the bread."

The fact that alum if taken with food into the stomach would be injurious is not questioned or disputed by any one. As scientific evidence would seem to prove that when food is raised with alum baking powder, some of the alum remains in the food, the prudent course for the housewife is apparent.

SIMON AX MARRIED.

Former Sherman County Man Gets Bride, Ottumwa, Ia.

The Ottumwa (Ia.) Courier has the following society news concerning the marriage of Simon Ax, formerly of Sherman county, and Miss Selma Anderson: "In the presence of over 250 guests, Miss Selma Anderson was united in marriage to Simon Ax at the Swedish Mission church last evening. The wedding was one of the prettiest church events of the season. The ceremony was performed by the pastor, Rev. G. N. Tegnell, the ring service being used.

The bridesmaids were Miss Jennie Anderson of Monteville, sister of the bride, and Miss Anna Oden of Eldon. The groomsmen were Klaus Klung and David Anderson, a brother of the bride. To the strains of Mendelssohn's wedding march the bridal party advanced to a beautiful wedding arch in front of the church pulpit. Here the service was performed. At the conclusion of the ceremony the guests went to the basement of the church where the reception was held and a three-course wedding supper was served.

The church auditorium was prettily decorated with roses, smilax and palms. The decorations of the basement were similar. The bride was attired in white peau de sole, and wore a bridal veil. She carried a bouquet of white roses. Miss Anderson's gown was of white figured organdie, and Miss Oden's of white embroidered satin.

The bride is a daughter of Mr. and Mrs. August Anderson of Monteville, but has resided in this city for a number of years. During which time she has made many friends by her charming personality. The groom has resided in Ottumwa for about six months, having come here from his home in Goodland, Kan. He is employed in the furniture store of W. H. Cooper & Son.

The ushers were Oscar Anderson, Reuben Lungen, Ernest Akerson and E. Albert Hart.

Prof. A. S. Mitchell of Milwaukee, late chemist to the Wisconsin Dairy and Food Commission, in testifying before the Congressional Committee, which was collecting information to aid in the matter of pure food legislation, said that there was no question as to the tendency of the chemical impurities which would remain in food made with alum baking powders would be deleterious. As to the claim by the manufacturers that alum powders left no alum in the food, he said he had failed to find any such basis which, in the ordinary process of cooking, would not leave some soluble alum in the food.

Doctor Schweitzer, the accomplished professor of chemistry at the University of Missouri, after a series of experiences with bread raised with alum baking powder, reported: "Careful analysis of the bread thus prepared shows a portion of the alum from the baking powders remaining in the bread."

The fact that alum if taken with food into the stomach would be injurious is not questioned or disputed by any one. As scientific evidence would seem to prove that when food is raised with alum baking powder, some of the alum remains in the food, the prudent course for the housewife is apparent.

BIG RAIN VISITS THIS COUNTY

PLENTY OF MOISTURE HERE AND CROPS LOOKING WELL.

The Storm Was a Soaker and Broke the Dry Period in Western Kansas.

Sherman county was completely covered and soaked with a two-inch rain Tuesday night and Wednesday morning. It broke the spell of dry weather, and put all growing vegetation in fine condition. Wheat and other small grain from now on will make a surprising growth, and the late sowings of corn and other food-crops will come rapidly on.

The rain was more or less general over the state, and broke up the spell of dry weather that was hurting crops particularly in eastern and central Kansas. Western Kansas was really better off than sections farther east, because the wheat is less far advanced. More than that, the soil contained more moisture, and except where crops had been put in in good time, there was nothing hurting in Sherman county.

Goodland was again visited by a heavy thunder shower yesterday afternoon.

SELDEN EASY PICKING.

Couldn't Do Anything With Goodland—Score 8 to 0.

Fully fifty hundred people witnessed the ball game in the Goodland Athletic park Sunday afternoon, between the local Athletics and Selden. The Goodland players put up a model game, only one error being made. The Selden club was strengthened with players Wright and McBride of Smith Center, and a Colby man or two, but they never scored in the nine innings, and succeeded in getting only two men as far as third base. They hit the ball a little sharp occasionally, but the infield killed the runners off by its superb work. They couldn't get a base on Mahoney, and after they had paid the penalty of the attempt several times, the Selden boys knew what they were up against. The score at the close of the game was 8 to 0 for Goodland.

Mahoney and Morehead did good work as battery for Goodland, and McBride and Motes won considerable credit for Selden. Selden's errors cost her several runs, but cutting those out, she was outclassed by about a score of 4 to 6.

POSTOFFICE BUSINESS.
Continually on the Increase in Goodland, Says Postmaster Stevens.

Postmaster Stevens, who for the last four years has had a chance to observe the increase in Uncle Sam's business in Goodland, being the postmaster here for the last four years, says that the receipts at this place have been on the increase continually. As an indication of how things are rushing along at the postoffice, he says that the year just past shows double the business or 100 per cent increase over the previous year, 1904.
